v8::internal::RUNTIME
_FUNCTION_RETURN_PAIR

v8::internal::anonymous
_namespace{runtime-scopes
::cc}::LoadLookupSlot

```
graph LR; A[v8::internal::RUNTIME_FUNCTION] --> C[v8::internal::anonymous_namespace{runtime-scopes::cc}::LoadLookupSlot]; B[v8::internal::RUNTIME_FUNCTION_RETURN_PAIR] --> C;
```

The diagram illustrates a mapping from two V8 runtime function identifiers to a specific load lookup slot. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::RUNTIME_FUNCTION' and the bottom box contains 'v8::internal::RUNTIME_FUNCTION_RETURN_PAIR'. Blue arrows point from the right side of each of these boxes to a single gray rectangular box on the right. This gray box contains the text 'v8::internal::anonymous_namespace{runtime-scopes::cc}::LoadLookupSlot'.
