

v8::internal::wasm  
::flat\_string\_to\_f64

v8::internal::StringToDouble

v8::internal::FlatString  
ToDouble

```
graph LR; A["v8::internal::wasm::flat_string_to_f64"] --> C["v8::internal::FlatStringToDouble"]; B["v8::internal::StringToDouble"] --> C;
```

The diagram illustrates a relationship between three V8 internal functions. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'v8::internal::wasm::flat\_string\_to\_f64' and the bottom box contains 'v8::internal::StringToDouble'. On the right, a gray rectangular box contains the text 'v8::internal::FlatStringToDouble'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both functions on the left point to the function on the right.
