RememberedSetsMarkingWorklist
::MarkingItem::MergeAndDeleteRememberedSets

```
graph LR; A["v8::internal::YoungGeneration  
RememberedSetsMarkingWorklist  
::MarkingItem::MergeAndDeleteRememberedSets"] --> B["v8::internal::ParallelWork  
Item::IsAcquired"]
```

The diagram illustrates a call to the `MergeAndDeleteRememberedSets` method. The call originates from the `v8::internal::YoungGenerationRememberedSetsMarkingWorklist::MarkingItem` namespace. A blue arrow points from this call to the `v8::internal::ParallelWorkItem::IsAcquired` method, indicating that the marking worklist item is being processed by the parallel work item's acquisition logic.
