

v8::Template::SetLazyData
Property

v8::Template::SetNativeData
Property

v8::anonymous_namespace
{api::cc}::TemplateSetAccessor

```
graph LR; A[v8::Template::SetLazyData Property] --> C[v8::anonymous_namespace {api::cc}::TemplateSetAccessor]; B[v8::Template::SetNativeData Property] --> C;
```

The diagram illustrates the relationship between V8 template property setters and a common accessor. On the left, two white rectangular boxes represent the setters: 'v8::Template::SetLazyData Property' (top) and 'v8::Template::SetNativeData Property' (bottom). On the right, a gray rectangular box represents the accessor: 'v8::anonymous_namespace {api::cc}::TemplateSetAccessor'. Two blue arrows point from the right side of each setter box to the left side of the accessor box, indicating that both setters utilize this common accessor.
