

v8::internal::interpreter
::Interpreter::GetDispatchCounter

```
graph LR; A["v8::internal::interpreter  
::Interpreter::GetDispatchCounter"] --> B["v8::internal::interpreter  
::Bytecodes::ToByte"]
```

A diagram showing a call from the `GetDispatchCounter` method in the `v8::internal::interpreter::Interpreter` namespace to the `ToByte` method in the `v8::internal::interpreter::Bytecodes` namespace. The source box is shaded gray and the target box is white. A blue arrow points from the source to the target.
