

v8::base::Double::value

```
graph LR; A[v8::base::Double::value] --> B[v8::base::uint64_to_double];
```

A diagram showing a call to the `v8::base::uint64_to_double` function. A gray box on the left contains the text `v8::base::Double::value`. A blue arrow points from this box to a white box on the right. The white box contains the text `v8::base::uint64_to_double` on two lines.

v8::base::uint64_to
_double
