Info::UpdateFromFunctionLiteral  
ForLiveEdit"] --> B["v8::internal::SharedFunction  
Info::SetFunctionTokenPosition"]; B --> C["v8::internal::SharedFunction  
Info::function_token_position"]
```

The diagram illustrates a three-step process for updating function token position. It consists of three rectangular boxes connected by blue arrows pointing from left to right. The first box is white and contains the text 'v8::internal::SharedFunction Info::UpdateFromFunctionLiteral ForLiveEdit'. The second box is also white and contains 'v8::internal::SharedFunction Info::SetFunctionTokenPosition'. The third box is gray and contains 'v8::internal::SharedFunction Info::function_token_position'.
