

v8::internal::maglev
::NodeInfo::ClearUnstableMaps
IfAny

```
graph LR; A["v8::internal::maglev  
::NodeInfo::ClearUnstableMaps  
IfAny"] --> B["v8::internal::maglev  
::NodeInfo::ClearUnstableMaps"]
```

The diagram consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box is white with a black border and contains the text 'v8::internal::maglev', '::NodeInfo::ClearUnstableMaps', and 'IfAny' on three lines. The right box is gray with a black border and contains the text 'v8::internal::maglev' and '::NodeInfo::ClearUnstableMaps' on two lines. The arrow indicates a transformation or mapping from the left state to the right state, specifically showing the removal of the 'IfAny' argument.
