

v8::internal::compiler
::BitsetType::Lub

v8::internal::maglev
::MaglevGraphBuilder
::TryGetUint32Constant

v8::internal::IsUint32Double

```
graph LR; A["v8::internal::compiler::BitsetType::Lub"] --> C["v8::internal::IsUint32Double"]; B["v8::internal::maglev::MaglevGraphBuilder::TryGetUint32Constant"] --> C;
```

The diagram illustrates a dependency or call relationship. Two source nodes on the left point to a single target node on the right. The top source node is labeled 'v8::internal::compiler::BitsetType::Lub'. The bottom source node is labeled 'v8::internal::maglev::MaglevGraphBuilder::TryGetUint32Constant'. Both source nodes are white with black borders. The target node is labeled 'v8::internal::IsUint32Double' and has a gray fill with a black border. Blue arrows indicate the direction of the relationship from the source nodes to the target node.
