

v8::internal::torque
::TypeVisitor::ComputeType

v8::internal::torque
::ClassType::HasStaticSize

v8::internal::torque
::TypeOracle::GetJSObjectType

```
graph LR; A["v8::internal::torque::TypeVisitor::ComputeType"] --> C["v8::internal::torque::TypeOracle::GetJSObjectType"]; B["v8::internal::torque::ClassType::HasStaticSize"] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, two white rectangular boxes represent source functions: 'v8::internal::torque::TypeVisitor::ComputeType' (top) and 'v8::internal::torque::ClassType::HasStaticSize' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::torque::TypeOracle::GetJSObjectType'. Two blue arrows point from the source boxes to the target box, indicating that both source functions are mapped to or inherit from the target function.
