

v8::internal::PlatformEmbedded
FileWriterMac::DeclareFunctionBegin

v8::internal::PlatformEmbedded
FileWriterMac::DeclareUInt32

v8::internal::PlatformEmbedded
FileWriterMac::DeclareLabel

```
graph LR; A["v8::internal::PlatformEmbedded  
FileWriterMac::DeclareFunctionBegin"] --> C["v8::internal::PlatformEmbedded  
FileWriterMac::DeclareLabel"]; B["v8::internal::PlatformEmbedded  
FileWriterMac::DeclareUInt32"] --> C;
```

The diagram illustrates a relationship between three V8 internal functions. On the left, two white rectangular boxes represent source functions: 'v8::internal::PlatformEmbedded FileWriterMac::DeclareFunctionBegin' (top) and 'v8::internal::PlatformEmbedded FileWriterMac::DeclareUInt32' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::PlatformEmbedded FileWriterMac::DeclareLabel'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source functions call or utilize the target function.
