

v8::internal::wasm
::AsyncStreamingDecoder
::CreateNewBuffer

```
graph LR; A["v8::internal::wasm  
::AsyncStreamingDecoder  
::CreateNewBuffer"] --> B["v8::internal::wasm  
::AsyncStreamingDecoder  
::module_offset"]
```

A diagram showing a call from the `CreateNewBuffer` method to the `module_offset` property. The left box is shaded gray and contains the text `v8::internal::wasm`, `::AsyncStreamingDecoder`, and `::CreateNewBuffer`. A blue arrow points from the right side of this box to the left side of the right box. The right box is white and contains the text `v8::internal::wasm`, `::AsyncStreamingDecoder`, and `::module_offset`.
