

v8::internal::maglev  
::AnyUseMarkingProcessor  
::DropInputUses

```
graph LR; A["v8::internal::maglev  
::AnyUseMarkingProcessor  
::DropInputUses"] --> B["v8::internal::maglev  
::ValueNode::mark_unused  
_inputs_visited"]
```

A diagram showing a call from the DropInputUses method of the AnyUseMarkingProcessor class to the mark\_unused\_inputs\_visited method of the ValueNode class. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source to the target.

v8::internal::maglev
