

```
v8::internal::compiler  
::RepresentationSelector  
::TryOptimizeBigInt64Shift
```

```
graph LR; A["v8::internal::compiler  
::RepresentationSelector  
::TryOptimizeBigInt64Shift"] --> B["v8::internal::compiler  
::BigIntRef::AsInt64"]
```

A diagram showing a call from the `TryOptimizeBigInt64Shift` method in the `v8::internal::compiler::RepresentationSelector` class to the `AsInt64` method in the `v8::internal::compiler::BigIntRef` class. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source to the target.

```
v8::internal::compiler  
::BigIntRef::AsInt64
```
