```
graph LR; A["v8::internal::maglev::StoreMap::ClearUnstableNodeAspects"] --> C["v8::internal::maglev::StoreMap::object_input"]; B["v8::internal::compiler::turbohaft::GraphBuildingNodeProcessor::Process"] --> C;
```

The diagram illustrates a control flow or data dependency. Two source nodes on the left, one from the maglev StoreMap and one from the compiler's graph building node processor, both point via blue arrows to a single target node on the right, which is the object_input of the maglev StoreMap. The target node is shaded gray, while the source nodes are white with black borders.
