

std::true_type

```
graph BT; A["v8::internal::detail::is_simple_subtype<T, MaybeWeak<T>>"] --> B["std::true_type"]
```

The diagram illustrates a relationship between two C++ types. At the top is a box representing `std::true_type`, which is divided into three horizontal sections. Below it is a larger box representing `v8::internal::detail::is_simple_subtype<T, MaybeWeak<T>>`, also divided into three horizontal sections. A blue arrow points from the top section of the bottom box to the bottom section of the top box, indicating that the bottom box inherits from or is a subtype of the top box.
