

v8::internal::MacroAssembler
::BranchAndLinkLong

v8::internal::MacroAssembler
::BranchAndLinkShortHelper

v8::internal::Assembler::jal

```
graph LR; A["v8::internal::MacroAssembler::BranchAndLinkLong"] --> C["v8::internal::Assembler::jal"]; B["v8::internal::MacroAssembler::BranchAndLinkShortHelper"] --> C;
```

The diagram illustrates a mapping from two source methods to a single target method. On the left, two white rectangular boxes with black borders contain the source method names: 'v8::internal::MacroAssembler::BranchAndLinkLong' (top) and 'v8::internal::MacroAssembler::BranchAndLinkShortHelper' (bottom). On the right, a gray rectangular box with a black border contains the target method name: 'v8::internal::Assembler::jal'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both source methods are implemented by or delegate to the target method.
