

v8::internal::PrivateName
ScopeIterator::PrivateNameScope
Iterator

v8::internal::Scope
::Scope

v8::internal::ClassScope
::IsParsingHeritage

```
graph LR; A["v8::internal::PrivateNameScopeIterator::PrivateNameScopeIterator"] --> C["v8::internal::ClassScope::IsParsingHeritage"]; B["v8::internal::Scope::Scope"] --> C;
```

The diagram illustrates a relationship between three V8 internal classes. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::PrivateNameScopeIterator::PrivateNameScopeIterator' and the bottom box contains 'v8::internal::Scope::Scope'. On the right, there is a gray rectangular box containing 'v8::internal::ClassScope::IsParsingHeritage'. Two blue arrows point from the right side of the two white boxes to the left side of the gray box, indicating that both the PrivateNameScopeIterator and the Scope classes have a dependency on or relationship with the ClassScope::IsParsingHeritage class.
