

std::true\_type

```
classDiagram
    class std_true_type["std::true_type"]
    class v8_internal_is_direct_handle["v8::internal::is_direct_handle< T >"]
    v8_internal_is_direct_handle --|> std_true_type
```

The diagram illustrates a C++ inheritance relationship. At the top is a class box for `std::true_type`, which is divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. Below this box is a blue arrow pointing upwards, indicating inheritance. The arrow originates from a class box at the bottom. This bottom box is for `v8::internal::is_direct_handle< T >` and is shaded gray. It is also divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. The arrow points from the top section of the bottom box to the bottom section of the top box.

v8::internal::is\_direct  
\_handle< T >
