

v8::internal::compiler  
::RepresentationSelector  
::VisitSpeculativeAdditiveOp

```
graph LR; A["v8::internal::compiler  
::RepresentationSelector  
::VisitSpeculativeAdditiveOp"] --> B["v8::internal::compiler  
::RepresentationSelector  
::CanSpeculateAdditiveSafeInteger"]
```

A diagram showing a call from the `VisitSpeculativeAdditiveOp` method to the `CanSpeculateAdditiveSafeInteger` method. The source box on the left is white with a black border, and the target box on the right is gray with a black border. A blue arrow points from the right side of the source box to the left side of the target box.
