

```
cppgc::internal::anonymous  
_namespace{platform::cc}  
::CreateAllocatorIfNeeded
```

```
graph LR; A["cppgc::internal::anonymous  
_namespace{platform::cc}  
::CreateAllocatorIfNeeded"] --> B["v8::base::LeakyObject::get"]
```

A diagram showing a call from a C++GC internal function to a V8 LeakyObject method. A grey box on the left contains the C++GC function name, and a white box on the right contains the V8 method name. A blue arrow points from the grey box to the white box.

```
v8::base::LeakyObject::get
```
