

v8::internal::interpreter
::BytecodeArrayBuilder
::SetDeferredSourceInfo

```
graph LR; A["v8::internal::interpreter  
::BytecodeArrayBuilder  
::SetDeferredSourceInfo"] --> B["v8::internal::interpreter  
::BytecodeSourceInfo::is_valid"]
```

A diagram showing a call from the `SetDeferredSourceInfo` method of the `BytecodeArrayBuilder` class to the `is_valid` method of the `BytecodeSourceInfo` class. The left box is shaded gray and the right box is white. A blue arrow points from the left box to the right box.

v8::internal::interpreter
::BytecodeSourceInfo::is_valid
