

v8::internal::compiler  
::VariableTracker::State::Get

v8::internal::compiler  
::VariableTracker::State::Set

v8::internal::compiler  
::Variable::Invalid

```
graph LR; A["v8::internal::compiler::VariableTracker::State::Get"] --> C["v8::internal::compiler::Variable::Invalid"]; B["v8::internal::compiler::VariableTracker::State::Set"] --> C;
```

The diagram illustrates a control flow or dependency. Two source functions, 'v8::internal::compiler::VariableTracker::State::Get' and 'v8::internal::compiler::VariableTracker::State::Set', are shown on the left. Both have blue arrows pointing to a single target function, 'v8::internal::compiler::Variable::Invalid', which is highlighted with a gray background. The arrows originate from the right side of the source boxes and point towards the left side of the target box.
