

std::false_type

```
classDiagram
    class v8_internal_is_maybe_weak["v8::internal::is_maybe_weak<T>"]
    class std_false_type["std::false_type"]
    v8_internal_is_maybe_weak --|> std_false_type
```

The diagram illustrates an inheritance relationship. At the bottom is a gray-shaded class box for `v8::internal::is_maybe_weak<T>`, which is divided into three horizontal sections. A blue arrow with an open triangular head points from the top section of this box to the top section of a white class box above it, labeled `std::false_type`. This white box is also divided into three horizontal sections. The arrow indicates that `v8::internal::is_maybe_weak<T>` inherits from `std::false_type`.
