

v8::internal::maglev  
::AllocationBlock::PrintParams

```
graph LR; A["v8::internal::maglev  
::AllocationBlock::PrintParams"] --> B["v8::internal::maglev  
::AllocationBlock::allocation_type"]
```

A diagram showing a call from the `PrintParams` method to the `allocation_type` property. The left box is shaded gray and contains the text `v8::internal::maglev::AllocationBlock::PrintParams`. A blue arrow points from the right side of this box to the left side of the right box. The right box is white and contains the text `v8::internal::maglev::AllocationBlock::allocation_type`.
