

TorqueGeneratedTurboshaft
Word64RangeType

```
graph BT; A["v8::internal::TurboshaftWord64RangeType< TurboshaftWord64RangeType, TurboshaftWord64Type >"] --> B["TorqueGeneratedTurboshaftWord64RangeType"]
```

The diagram illustrates an inheritance relationship. At the bottom is a box representing the base class `v8::internal::TurboshaftWord64RangeType< TurboshaftWord64RangeType, TurboshaftWord64Type >`. A blue arrow points upwards from this box to a second box at the top, which represents the derived class `TorqueGeneratedTurboshaftWord64RangeType`. The top box is shaded gray and contains two additional empty rows, while the bottom box is white and also contains two empty rows.

v8::internal::Turboshaft
Word64RangeType< TurboshaftWord64
RangeType, TurboshaftWord64Type >
