

v8::internal::BytecodeArray
::SourcePosition

v8::internal::BytecodeArray
::SourceStatementPosition

v8::internal::BytecodeArray
::HasSourcePositionTable

```
graph LR; A[v8::internal::BytecodeArray::SourcePosition] --> C[v8::internal::BytecodeArray::HasSourcePositionTable]; B[v8::internal::BytecodeArray::SourceStatementPosition] --> C;
```

The diagram illustrates a relationship between three V8 internal classes. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::BytecodeArray::SourcePosition' and the bottom box contains 'v8::internal::BytecodeArray::SourceStatementPosition'. On the right, there is a single gray rectangular box containing the text 'v8::internal::BytecodeArray::HasSourcePositionTable'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'SourcePosition' and 'SourceStatementPosition' inherit from or are associated with 'HasSourcePositionTable'.
