

v8::internal::wasm
::WasmFunctionBuilder
::SetName

```
graph LR; A["v8::internal::wasm  
::WasmFunctionBuilder  
::SetName"] --> B["v8::internal::wasm  
::name"]
```

A diagram showing a call from the `SetName` method of the `WasmFunctionBuilder` class to a function named `name`. The source is in a grey box and the target is in a white box, connected by a blue arrow.

v8::internal::wasm
::name
