

v8::internal::baseline
::BaselineAssembler::StaContext
SlotNoCell

v8::internal::baseline
::BaselineAssembler::StaModule
Variable

v8::internal::baseline
::BaselineAssembler::StoreTagged
FieldWithWriteBarrier

```
graph LR; A["v8::internal::baseline  
::BaselineAssembler::StaContext  
SlotNoCell"] --> C["v8::internal::baseline  
::BaselineAssembler::StoreTagged  
FieldWithWriteBarrier"]; B["v8::internal::baseline  
::BaselineAssembler::StaModule  
Variable"] --> C;
```

The diagram illustrates a mapping from two source code elements to a single target code element. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::baseline', '::BaselineAssembler::StaContext', and 'SlotNoCell'. The bottom box contains 'v8::internal::baseline', '::BaselineAssembler::StaModule', and 'Variable'. Blue arrows point from the right side of each of these two boxes to the left side of a single gray rectangular box on the right. This gray box contains the text 'v8::internal::baseline', '::BaselineAssembler::StoreTagged', and 'FieldWithWriteBarrier'.
