

v8::internal::compiler  
::RepresentationSelector  
::ProcessRemainingInputs

```
graph LR; A["v8::internal::compiler  
::RepresentationSelector  
::ProcessRemainingInputs"] --> B["v8::internal::compiler  
::NodeProperties::PastContextIndex"]
```

A diagram showing a call from the `RepresentationSelector::ProcessRemainingInputs` method to the `NodeProperties::PastContextIndex` property. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source to the target.
