

v8::internal::compiler
::anonymous_namespace
{revectorizer::cc}::IsSupportedLoad

```
graph LR; A["v8::internal::compiler  
::anonymous_namespace  
{revectorizer::cc}::IsSupportedLoad"] --> B["v8::internal::compiler  
::Node::opcode"]
```

A diagram showing a call from the function `IsSupportedLoad` in the `revectorizer::cc` namespace to the `Node::opcode` method in the `compiler` namespace.
