

v8::internal::wasm
::NativeModule::SetDebugState

```
graph LR; A["v8::internal::wasm  
::NativeModule::SetDebugState"] --> B["v8::internal::wasm  
::NativeModule::module"]
```

A diagram showing a call from the `SetDebugState` method to the `module` property. The left box is shaded gray and the right box is white. A blue arrow points from the left box to the right box.

v8::internal::wasm
::NativeModule::module
