

v8::internal::compiler
::turbohaft::BlockOriginTracking
Reducer::GetMaglevOrigin

```
graph LR; A["v8::internal::compiler  
::turbohaft::BlockOriginTracking  
Reducer::GetMaglevOrigin"] --> B["v8::internal::compiler  
::turbohaft::Block::index"]
```

A diagram showing a call from a Reducer to a Block's index. On the left, a gray box contains the text 'v8::internal::compiler', '::turbohaft::BlockOriginTracking', and 'Reducer::GetMaglevOrigin'. A blue arrow points from this box to a white box on the right. The white box contains the text 'v8::internal::compiler' and '::turbohaft::Block::index'.
