

v8::Context::GetDataFrom
SnapshotOnce

v8::Isolate::GetDataFrom
SnapshotOnce

v8::Local::FromRepr

```
graph LR; A[v8::Context::GetDataFromSnapshotOnce] --> C[v8::Local::FromRepr]; B[v8::Isolate::GetDataFromSnapshotOnce] --> C;
```

The diagram illustrates a relationship between three V8 JavaScript engine functions. On the left, there are two white rectangular boxes. The top box contains the text 'v8::Context::GetDataFromSnapshotOnce' and the bottom box contains 'v8::Isolate::GetDataFromSnapshotOnce'. On the right, there is a gray rectangular box containing the text 'v8::Local::FromRepr'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'v8::Context::GetDataFromSnapshotOnce' and 'v8::Isolate::GetDataFromSnapshotOnce' utilize or delegate to 'v8::Local::FromRepr'.
