

cppgc::internal::BasicCross
ThreadPersistent::operator=

cppgc::internal::BasicCross
ThreadPersistent::Release

cppgc::internal::BasicCross
ThreadPersistent::Clear

```
graph LR; A["cppgc::internal::BasicCrossThreadPersistent::operator="] --> C["cppgc::internal::BasicCrossThreadPersistent::Clear"]; B["cppgc::internal::BasicCrossThreadPersistent::Release"] --> C;
```

The diagram illustrates a relationship between three functions. On the left, two white rectangular boxes with black borders contain the function names 'cppgc::internal::BasicCrossThreadPersistent::operator=' and 'cppgc::internal::BasicCrossThreadPersistent::Release'. On the right, a gray rectangular box with a black border contains the function name 'cppgc::internal::BasicCrossThreadPersistent::Clear'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'operator=' and 'Release' are implemented or related to the 'Clear' function.
