

v8::internal::interpreter  
::BytecodeArrayBuilder  
::LoadContextSlot

```
graph LR; A["v8::internal::interpreter  
::BytecodeArrayBuilder  
::LoadContextSlot"] --> B["v8::internal::interpreter  
::Register::is_current  
_context"]
```

A diagram showing a call from the `LoadContextSlot` method of the `BytecodeArrayBuilder` class to the `is_current_context` method of the `Register` class. The left box is shaded gray and the right box is white. A blue arrow points from the left box to the right box.

v8::internal::interpreter  
::Register::is\_current  
\_context
