

v8::internal::UseScratch
RegisterScope::Exclude

v8::internal::UseScratch
RegisterScope::ExcludeFP

v8::internal::CPURegList
::IsEmpty

```
graph LR; A[v8::internal::UseScratchRegisterScope::Exclude] --> C[v8::internal::CPURegList::IsEmpty]; B[v8::internal::UseScratchRegisterScope::ExcludeFP] --> C;
```

The diagram illustrates a control flow or dependency relationship. Two source functions, 'v8::internal::UseScratchRegisterScope::Exclude' and 'v8::internal::UseScratchRegisterScope::ExcludeFP', are shown on the left. Arrows from both point to a single target function, 'v8::internal::CPURegList::IsEmpty', on the right. The target function box is shaded gray, while the source function boxes are white with black borders.
