

v8::internal::ScopeInfo
::ContextSlotIndex

v8::internal::ScopeInfo
::HasContext

v8::internal::ScopeInfo
::ContextLength

```
graph LR; A[v8::internal::ScopeInfo::ContextSlotIndex] --> C[v8::internal::ScopeInfo::ContextLength]; B[v8::internal::ScopeInfo::HasContext] --> C;
```

The diagram illustrates a mapping or relationship. On the left, there are two separate boxes. The top box contains the text 'v8::internal::ScopeInfo::ContextSlotIndex'. The bottom box contains the text 'v8::internal::ScopeInfo::HasContext'. On the right, there is a single box with a gray background containing the text 'v8::internal::ScopeInfo::ContextLength'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the right box, indicating that both 'ContextSlotIndex' and 'HasContext' are associated with or mapped to 'ContextLength'.
