

v8::internal::compiler
::Scheduler::GetData

```
graph LR; A[v8::internal::compiler::Scheduler::GetData] --> B[v8::internal::compiler::Node::id]
```

A diagram showing a call from the Scheduler::GetData method to the Node::id property. The Scheduler::GetData box is shaded gray, and the Node::id box is white. A blue arrow points from the Scheduler::GetData box to the Node::id box.

v8::internal::compiler
::Node::id
