

v8::internal::PreParser
::DeclareFormalParameters

v8::internal::ArrowHeadParsing
Scope::ValidateAndCreateScope

v8::internal::Declaration
Scope::SetHasNonSimpleParameters

```
graph LR; A[v8::internal::PreParser::DeclareFormalParameters] --> C[v8::internal::DeclarationScope::SetHasNonSimpleParameters]; B[v8::internal::ArrowHeadParsingScope::ValidateAndCreateScope] --> C;
```

The diagram illustrates a call graph where two functions from the v8::internal namespace serve as callers for a single target function. The callers are 'v8::internal::PreParser::DeclareFormalParameters' and 'v8::internal::ArrowHeadParsingScope::ValidateAndCreateScope', both shown in white boxes. The target function is 'v8::internal::DeclarationScope::SetHasNonSimpleParameters', shown in a grey box. Blue arrows indicate the flow of control from the callers to the target.
