

v8::internal::interpreter
::InterpreterAssembler
::GetRegisterListAtOperandIndex

```
graph LR; A["v8::internal::interpreter  
::InterpreterAssembler  
::GetRegisterListAtOperandIndex"] --> B["v8::internal::interpreter  
::Bytecodes::IsRegisterListOperandType"]
```

A diagram showing a call from the `InterpreterAssembler::GetRegisterListAtOperandIndex` method to the `Bytecodes::IsRegisterListOperandType` method. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source box to the target box.
