

v8::internal::Externalize
StringExtension::GetNativeFunction
Template

```
graph LR; A["v8::internal::ExternalizeStringExtension::GetNativeFunctionTemplate"] --> B["v8::internal::ExternalizeStringExtension::IsOneByte"]
```

A diagram showing a call from the `GetNativeFunctionTemplate` method to the `IsOneByte` method. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source box to the target box.
