

v8::internal::ProfilerListener
::CodeSweepEvent

v8::internal::ProfilerListener
::WeakCodeClearEvent

v8::internal::WeakCodeRegistry
::Sweep

```
graph LR; A[v8::internal::ProfilerListener::CodeSweepEvent] --> C[v8::internal::WeakCodeRegistry::Sweep]; B[v8::internal::ProfilerListener::WeakCodeClearEvent] --> C;
```

The diagram illustrates a relationship between two event types and a sweep function. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::ProfilerListener::CodeSweepEvent' and the bottom box contains 'v8::internal::ProfilerListener::WeakCodeClearEvent'. On the right, there is a gray rectangular box containing the text 'v8::internal::WeakCodeRegistry::Sweep'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both event types trigger or are associated with the sweep function.
