

/mnt/V8SourceCode/src
/snapshot/startup-deserializer.h

```
graph BT; A["/mnt/V8SourceCode/src  
/execution/isolate.cc"] --> C["/mnt/V8SourceCode/src  
/snapshot/startup-deserializer.h"]; B["/mnt/V8SourceCode/src  
/snapshot/startup-deserializer.cc"] --> C;
```

The diagram illustrates a dependency relationship between three files in the V8 source code. At the top is a gray box representing the header file `/mnt/V8SourceCode/src/snapshot/startup-deserializer.h`. Below it are two white boxes. The left box represents the source file `/mnt/V8SourceCode/src/execution/isolate.cc`, and the right box represents the source file `/mnt/V8SourceCode/src/snapshot/startup-deserializer.cc`. Two blue arrows point from the bottom of each white box to the bottom of the gray box, indicating that both source files include or depend on the header file.

/mnt/V8SourceCode/src
/execution/isolate.cc
