

std::equal_to< T >

The diagram illustrates an inheritance relationship. At the top is a white box representing the `std::equal_to< T >` class, divided into three horizontal sections. Below it is a gray box representing the `v8::internal::compiler::OpEqualTo< T >` class, also divided into three horizontal sections. A blue arrow points from the top of the gray box to the bottom of the white box, indicating that the gray box inherits from the white box.
