/objects/js-break-iterator-inl.h"]; B["/mnt/V8SourceCode/src  
/objects/js-break-iterator.cc"] --> C;
```

The diagram illustrates a dependency structure where two source files include a common header file. The header file is located at /mnt/V8SourceCode/src/objects/js-break-iterator-inl.h. The first source file, /mnt/V8SourceCode/src/builtins/builtins-intl.cc, is on the left, and the second source file, /mnt/V8SourceCode/src/objects/js-break-iterator.cc, is on the right. Both source files have blue arrows pointing to the header file, indicating that they both include it.
