

v8::internal::torque
::TypeVisitor::ComputeType

```
graph LR; A["v8::internal::torque  
::TypeVisitor::ComputeType"] --> B["v8::internal::torque  
::IsAnyUnsignedInteger"]
```

A diagram showing a call from the `ComputeType` method of the `v8::internal::torque::TypeVisitor` class to the `IsAnyUnsignedInteger` method of the `v8::internal::torque` namespace. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source to the target.
