

v8::internal::interpreter  
::BytecodeGenerator::VisitCallSuper

```
graph LR; A["v8::internal::interpreter  
::BytecodeGenerator::VisitCallSuper"] --> B["v8::internal::interpreter  
::BytecodeArrayBuilder  
::CallJSRuntime"]
```

The diagram consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box is white with a black border and contains the text 'v8::internal::interpreter' followed by '::BytecodeGenerator::VisitCallSuper' on the next line. The right box is gray with a black border and contains the text 'v8::internal::interpreter' followed by '::BytecodeArrayBuilder' and '::CallJSRuntime' on the next two lines.
