

v8::internal::heap
::List::PushBack

v8::internal::heap
::List::PushFront

v8::internal::heap
::List::AddFirstElement

```
graph LR; A["v8::internal::heap::List::PushBack"] --> C["v8::internal::heap::List::AddFirstElement"]; B["v8::internal::heap::List::PushFront"] --> C;
```

The diagram illustrates a relationship between three V8 internal functions. On the left, two white rectangular boxes represent source functions: 'v8::internal::heap::List::PushBack' (top) and 'v8::internal::heap::List::PushFront' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::heap::List::AddFirstElement'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both 'PushBack' and 'PushFront' are implemented by or delegate to 'AddFirstElement'.
