

std::false_type

```
classDiagram
    class std_false_type["std::false_type"]
    class cppgc_has_garbage_collected_type_marker["cppgc::internal::HasGarbageCollectedTypeMarker< T, typename >"]
    std_false_type <|-- cppgc_has_garbage_collected_type_marker
```

The diagram illustrates an inheritance relationship. At the top is a class box for `std::false_type`, which is divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. Below this box is a blue arrow with a hollow triangular head pointing upwards. At the base of the arrow is a second class box for `cppgc::internal::HasGarbageCollectedTypeMarker< T, typename >`. This box is also divided into three horizontal sections; the top section contains the class name, and the middle and bottom sections are shaded gray.

cppgc::internal::HasGarbage
CollectedTypeMarker< T,
typename >
